

Vision Area 6: Healthcare Access

Objective 36: Increase the proportion of persons with health insurance

People without health insurance are more likely to be in poor health than the insured. A lack of health insurance can result in increased visits to the emergency department and decreased routine care visits with a primary care provider.

Statistics and Goals

Measure: Percentage of persons age 18-64 with any type of health insurance

Source: National Health Interview Survey and the American Community Survey

National Baseline	Maryland Baseline	Healthy People 2020 Target	Maryland 2014 Target
83.2%	81.7%	100%	92.8%
